

MORTGAGE LOAN PROCESSING

As a full-service Mortgage Loan Processing Center we can help you close more loans. Our licensed processors have over 20 years' experience processing Conventional, Jumbo Portfolio, FHA, VA, USDA, Streamline, and Home Equity Loans.

Loan processing is assuredly the most detail-oriented, labor-intensive touch point in the mortgage loan lifecycle. It is critical to handle processing well for success or failure in the mortgage industry. On-going regulatory reform along with changing loan products and programs inevitably drive your focus and time away from doing what you do best – sourcing and originating loans. As a loan originator, increasing sales is the core of your business. That's what you should be doing—not spending hours on paperwork, making sure the loans get processed and the details get arranged. By utilizing AFS for all your processing you will have more time to focus on your core business efforts, increase your productivity and efficiency while reducing your costs and increasing profits.

Faster closing times mean you can close more loans per month and you get paid sooner.

Your dedicated team will begin processing your file within 24-48 business hours and customize turn-time based on your standard lock.

We can help you reduce your office expenses by saving money on recruiting and hiring, training, salaries, insurance, workman's compensation, office supplies and office space.

You now have more time to focus on marketing and increasing sales.

Variable loan volume doesn't mean staffing unnecessary employees. Take advantage of our mortgage processing solution to manage your fluctuating volume.
